1. What Learn System does

Learn System is an online preparation platform for the **SSC CGL** (Staff Selection Commission Combined Graduate Level) examination. It works in any modern web browser, on a phone or on a computer. Nothing needs to be installed.

It covers all six SSC CGL subjects:

- Quantitative Aptitude and Mathematical Abilities
- General Intelligence and Reasoning
- English Language and Comprehension
- General Awareness (including current affairs)
- Computer Knowledge
- Statistics (optional paper)

Learn System does more than give you questions. It watches how you answer (right or wrong, how fast, whether you needed a hint) and uses that to tell you *what to study next*. The whole system follows one simple learning loop:

STEP	WHAT YOU DO	WHERE
Diagnose	Take a one-time baseline test so the system knows your starting level.	More → Diagnostic
Learn & practise	Read short lessons and practise topic by topic, or in mixed sets.	Practice
Test	Take timed sectional tests and full mock tests in real exam conditions.	Tests
Review mistakes	Read explanations for every question you missed, then retest similar questions.	Session results, Progress
Revise	Questions you got wrong come back after 1, 3, 7 and 21 days; quick-recall cards keep facts fresh.	Practice → Spaced Revision, Revision

2. Getting started and logging in

Opening the website

Open your browser (Chrome, Safari, Edge or Firefox) and go to **https://ls.nsrk.in**. The home page shows what Learn System offers and has a **Student login** box on the right (or below, on a phone).

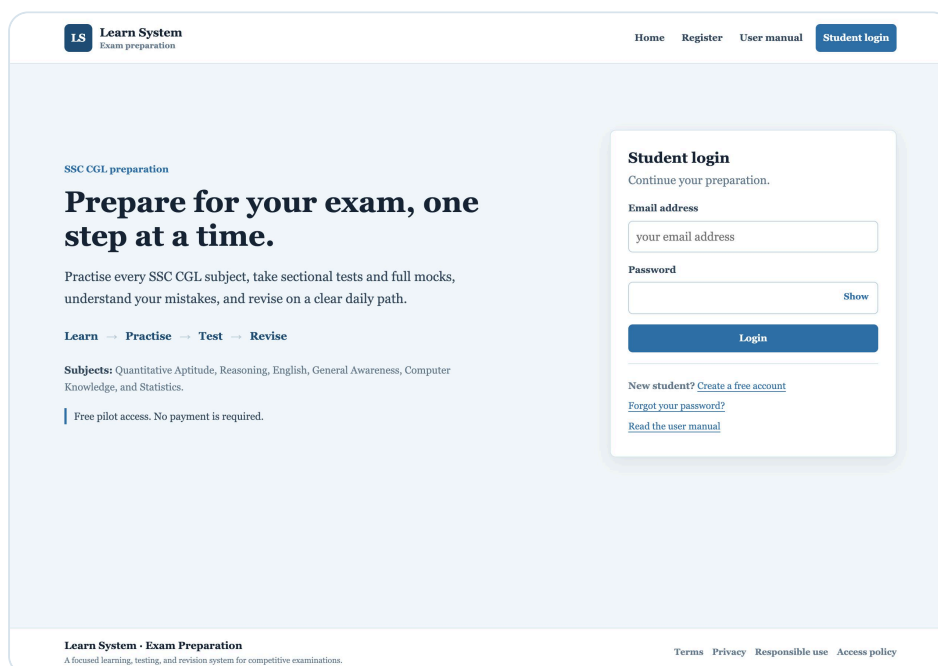

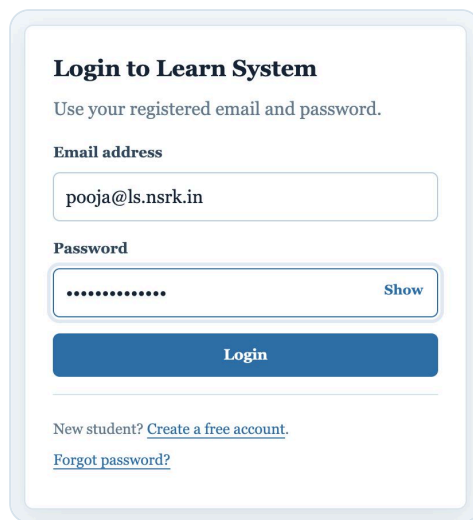

Figure 2.1. The Learn System home page.

Logging in

1. Type your email address in **Email address**. Capital or small letters do not matter.
2. Type your password in **Password**. Passwords *are* case-sensitive.
3. Press **Login**. You arrive at your dashboard.

The image shows a login form titled "Login to Learn System". Below the title is the instruction "Use your registered email and password." There are two input fields: "Email address" containing "pooja@ls.nsrk.in" and "Password" containing masked characters ".....". A "Show" link is next to the password field. Below the fields is a blue "Login" button. At the bottom, there are two links: "New student? [Create a free account.](#)" and "[Forgot password?](#)".

Testers

You have been given a ready-made test account such as *pooja@ls.nsrk.in* and a shared password. You do not need to register. See Guide for testers.

Creating a new account (real students)

1. On the home page choose **Register** (top menu), or *Create a free account* under the login box.
2. Select the exam **SSC CGL**.
3. Enter an email address you can open right now, your name, and a password of at least 12 characters (a short phrase is easiest to remember). Type the password again to confirm.
4. Tick the box to accept the terms, privacy policy, responsible-use rules and access policy. Optionally tick the email-notices box.
5. Press **Create account**. Open the verification email and click its link, then log in.

Logging out

Open **More** → **Log out**. Always log out on a shared or public computer.

3. Finding your way around

The top menu (computer)

After login, every page has the same menu at the top:

MENU ITEM	WHAT IT IS FOR
-----------	----------------

Dashboard	Your home page: readiness, today's target, what to do next.
Practice	All practice modes, topic lessons and spaced revision of questions.
Tests	Full mock tests and sectional tests in exam conditions, and your past test results.
Progress	Detailed analysis of your performance by subject, topic, difficulty and speed.
Revision	Quick-recall revision cards (facts, formulas, rules, traps).
More	User Manual, Diagnostic, Notifications, My Account and Log out.

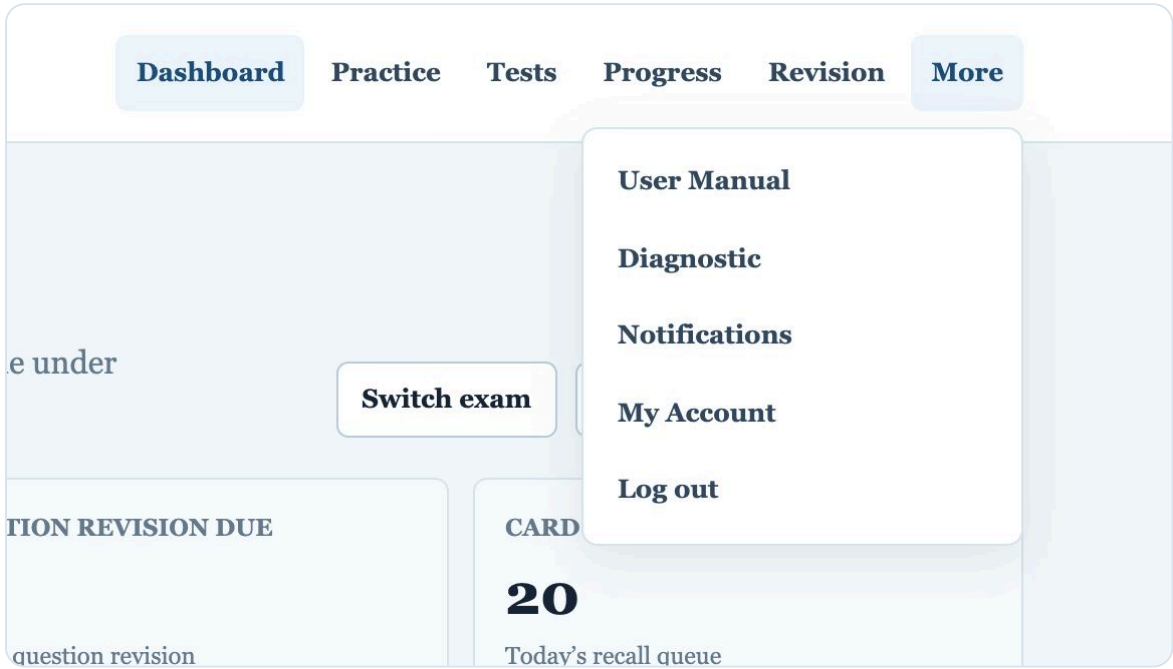

Figure 3.1. The top menu with **More** opened.

On a phone

On a phone the menu is folded into a **Menu** button at the top right. Tap it to see Dashboard, Practice, Tests, Progress, Revision and More.

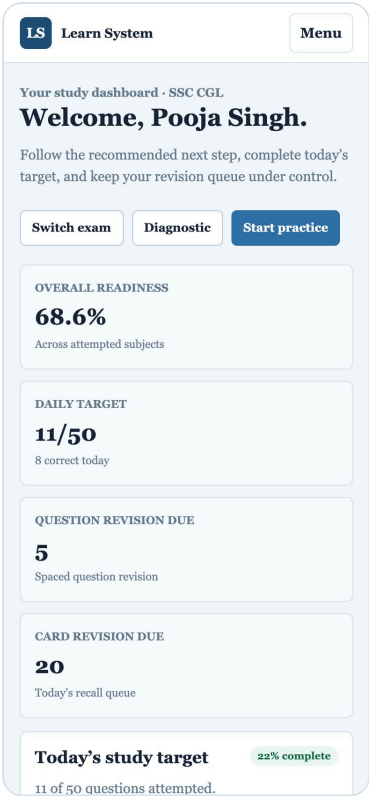

Figure 3.2. Dashboard on a phone.

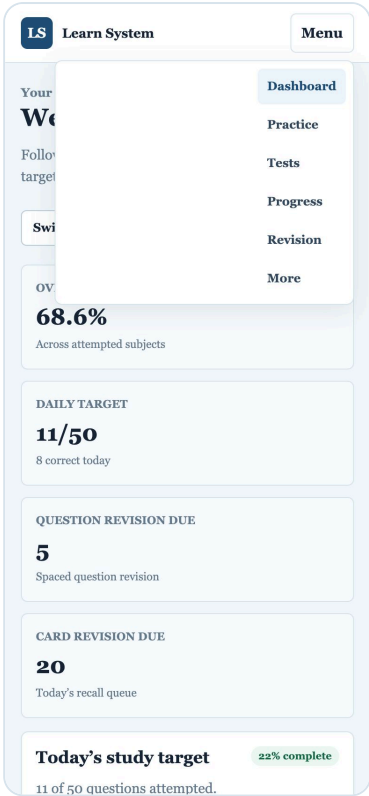

Figure 3.3. Tapping **Menu**.

Tip

The **LS** logo at the top left always takes you back to your dashboard.

4. Your dashboard

The dashboard is the first page you see after login. It answers three questions: *How ready am I? What should I do today? What needs revision?*

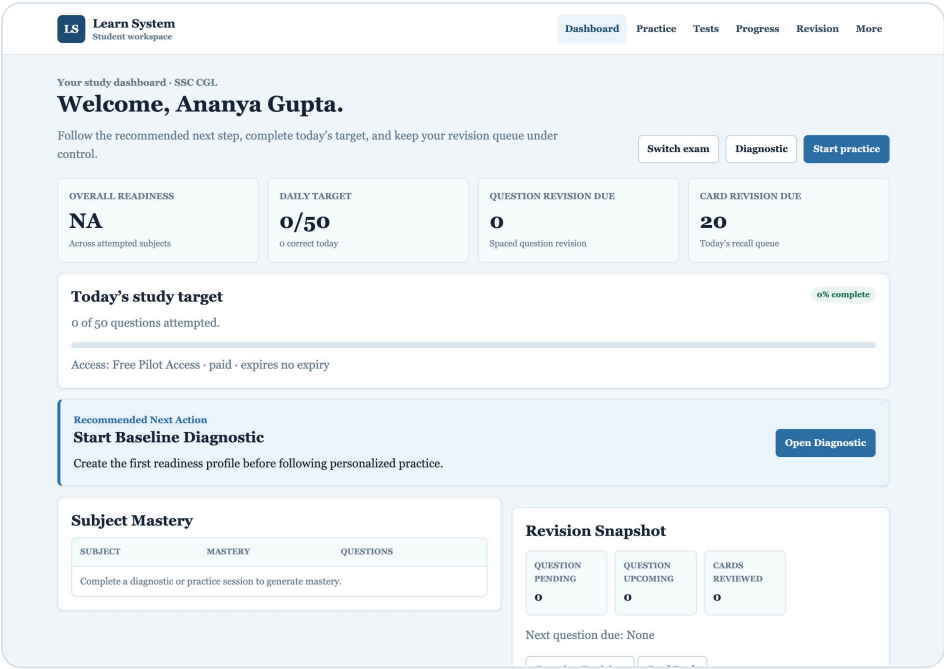

Figure 4.1. The dashboard of a brand-new student. Readiness shows “NA” until you answer questions, and the recommended action is to take the baseline diagnostic.

The four summary tiles

TILE	MEANING
Overall readiness	Your overall exam-readiness score (0–100%) across the subjects you have attempted. See how readiness is calculated.
Daily target	Questions attempted today out of your daily goal (50 by default), and how many were correct. You can change the goal in My Account.
Question revision due	Previously attempted questions that are due to be answered again today (spaced revision).
Card revision due	Revision cards due for quick recall today.

Today’s study target and Recommended Next Action

Below the tiles, a progress bar shows how much of today’s target is complete. The **Recommended Next Action** box is the most important part of the dashboard: it tells you the single best thing to do next, with a button to go straight there. Examples:

- **Start Baseline Diagnostic:** you are new and the system needs your starting level.
- **Continue Active Session:** you left a practice session or test unfinished.
- **Clear Due Question Revision:** questions are waiting for spaced revision.
- A study or practice suggestion for your weakest topic.

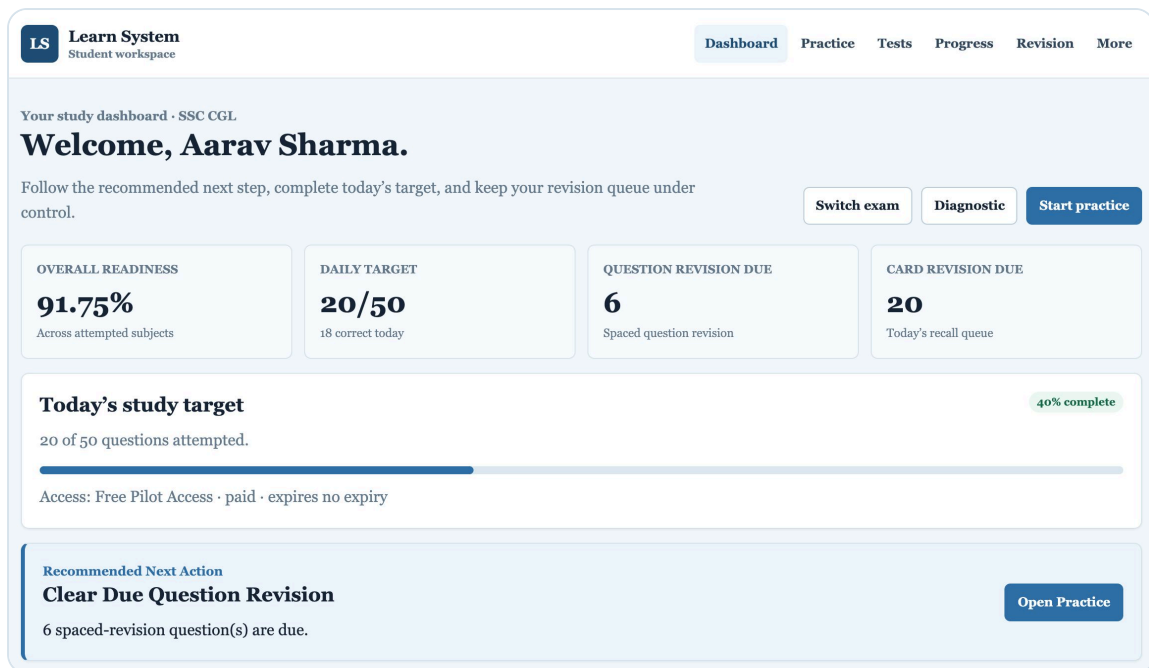

Figure 4.2. The dashboard of an advanced student, with high readiness, part of today's target done and revision due.

Tip

If you are unsure what to do, simply follow the Recommended Next Action every time you log in.

Subject Mastery

A table of all subjects you have attempted, with a mastery score, a readiness band (weak, developing, ready, advanced) and the number of questions answered, correct and skipped.

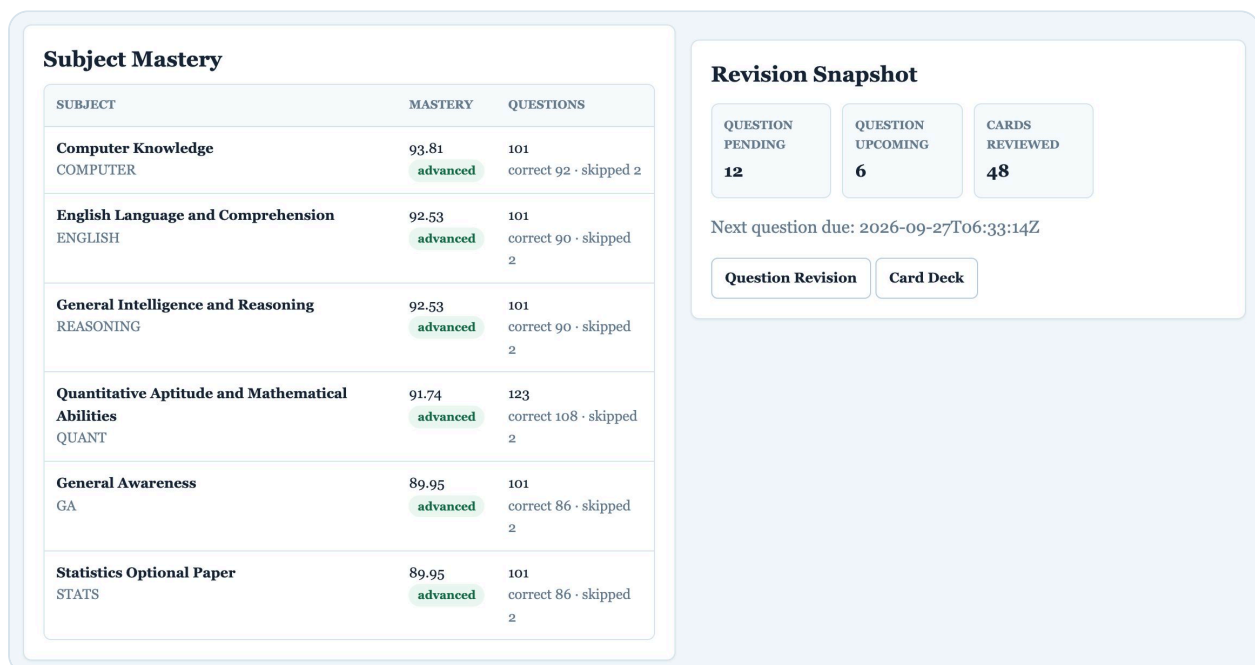

Figure 4.3. Subject Mastery and the Revision Snapshot.

Revision Snapshot

How many questions are pending revision now, how many are coming up later, how many cards you have reviewed, and when the next question is due.

Weak Areas and Recent Sessions

Weak Areas lists the topics where you make the most mistakes, with a weakness score (higher means weaker) and the reason (for example, *Repeated mistakes*). Press **Study** to open the lesson for that topic. **Recent Sessions** lists your latest practice sessions and tests with their status and score.

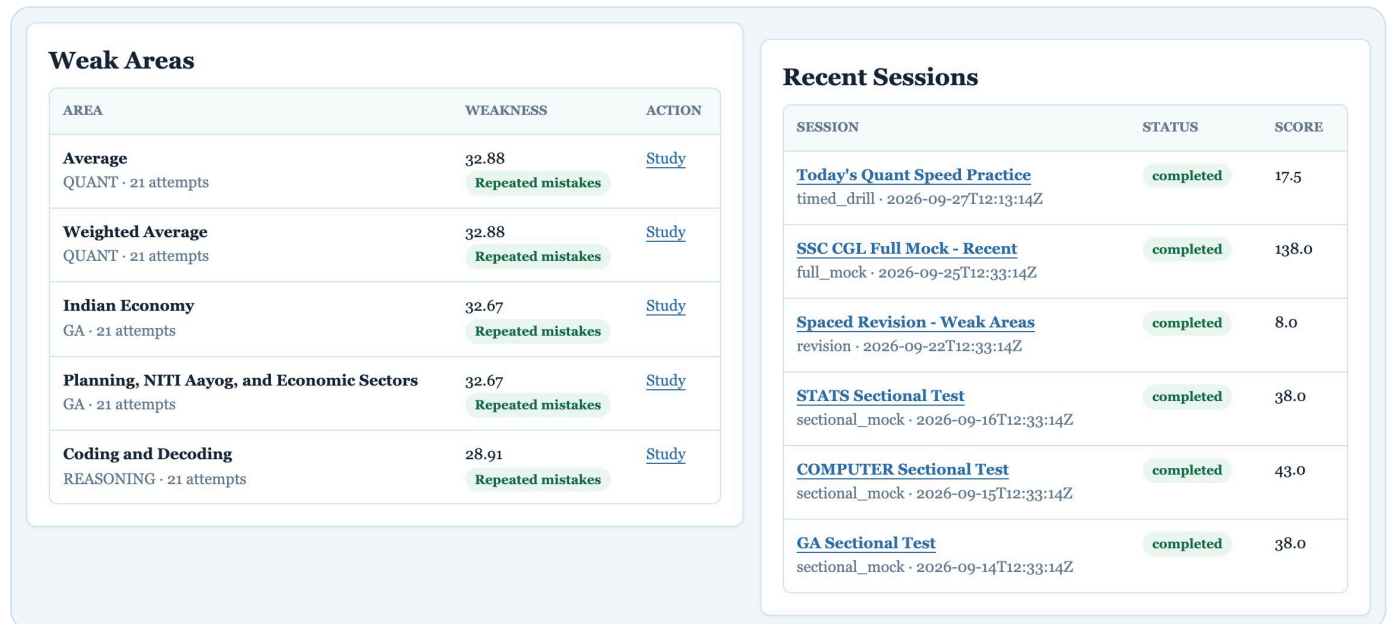

Figure 4.4. Weak Areas (with Study links) and Recent Sessions.

Buttons at the top of the dashboard

- **Switch exam:** opens My Account to change the active exam (only relevant if you are enrolled in more than one).
- **Diagnostic:** opens the baseline diagnostic page.
- **Start practice:** opens the Practice page.

5. The baseline diagnostic

The baseline diagnostic is a **one-time starting test**. It checks all six subjects in a balanced way so that Learn System can build your first readiness profile and recommend what to study first. Take it at the very beginning.

QUESTIONS	TIME	MODE	ANSWERS SHOWN
50	60 minutes	Strict (no hints)	After you submit

Your starting point · SSC CGL

Baseline diagnostic.

Take this once at the beginning. Learn System will use the result to recommend what you should study and practise first.

Baseline Diagnostic

This balanced first test checks all six subjects and gives you a starting study plan. Answers and explanations appear after submission.

REVIEW

After
[Start Diagnostic](#)

Figure 5.1. The diagnostic page before starting. Open it from the dashboard or **More → Diagnostic**.

1. Open **More → Diagnostic** (or press *Open Diagnostic* on the dashboard).
2. Press **Start Diagnostic**. The timer starts.
3. Answer each question and press **Save answer**, or **Skip for now** if unsure. See Answering questions.
4. When you have finished, press **Submit test and see results**. The site asks you to confirm and tells you how many questions are still unanswered.

Important

Answer honestly and do not guess wildly. The diagnostic is not a score to show anyone. It only tells the system where to start helping you.

If you stop in the middle

You can leave and come back later. Your answers are saved, and the dashboard shows **Continue Active Session**. Press **Continue** to resume at the next unanswered question. Note that the timer keeps running while the session is open.

Recommended Next Action

Continue Active Session

Baseline Diagnostic - In Progress is still active.

[Continue](#)

Figure 5.2. Resuming an unfinished diagnostic from the dashboard.

Your diagnostic result

After you submit, the Diagnostic page shows:

- **First Recommended Path:** where to begin your study.
- **Initial Readiness:** your starting mastery and band for each subject.
- **First Weak Areas:** the topics that need attention first.

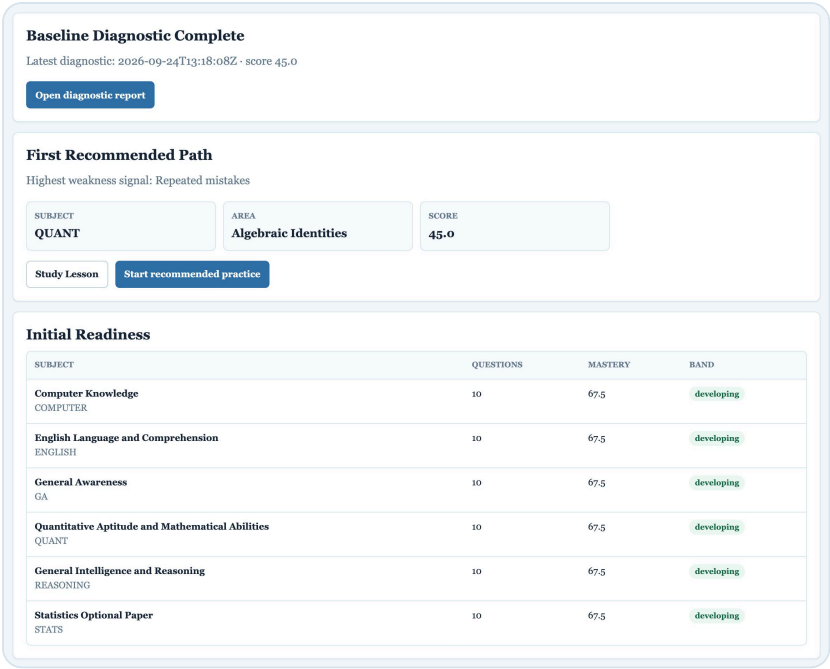

Figure 5.3. Diagnostic results: the first recommended path and initial readiness. First Weak Areas appear further down the page.

6. Answering questions

Every practice session, test and the diagnostic uses the same question screen.

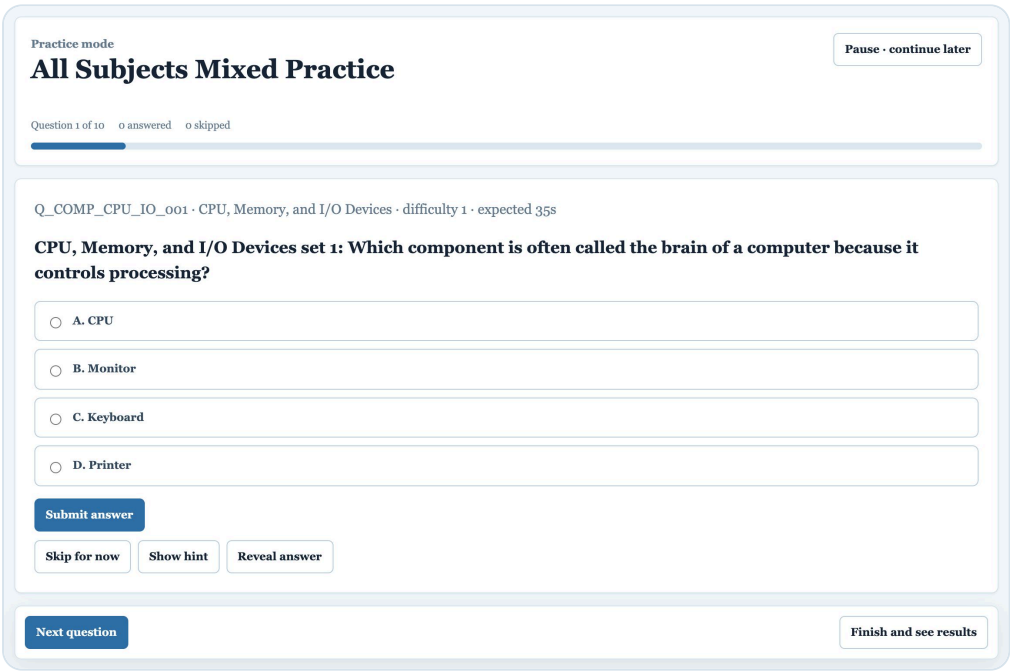

Figure 6.1. The question screen in **practice mode**.

Parts of the question screen

- **Header:** the session name, *Question X of Y*, how many answered and skipped, and a progress bar.
- **Question details line:** the question code, topic, difficulty level (1 = easiest) and the *expected time*, meaning how long a well-prepared candidate should take.
- **Options A–D:** tap or click an option to select it.

- **Buttons:** explained below.

The buttons

BUTTON	WHAT IT DOES
Submit answer (practice)	Records your selected option. You stay on the question and see straight away whether you were right, with the full explanation. Choose an option first; if you forget, a red message reminds you.
Save answer (test)	Records your selected option and moves to the next question. Answers stay hidden until you submit the test.
Skip for now	Leaves the question unanswered and moves on. You can come back with <i>Previous</i> . Skipped questions are prioritised for revision.
Show hint (practice only)	Shows a hint without giving away the answer. Hint use is recorded.
Reveal answer (practice only)	Shows the correct answer. Use it only when truly stuck; it is recorded and the question will come back for revision.
Previous / Next question	Move between questions in the session.
Finish and see results (practice) / Submit test and see results (test)	Ends the session and opens your results. You are asked to confirm first, and told how many questions are unanswered (they count as skipped).
Pause · continue later	Leaves the screen without finishing. Your answers are kept and the session stays open, so you can continue later from the dashboard. In timed sessions this button reads Pause (timer keeps running) because the clock does not stop.

Seeing the explanation

In practice mode, when you press **Submit answer** you stay on the same question and see:

- A message at the top: **Correct.** or **Not quite. The correct answer is A.**
- The correct option highlighted in green (your wrong choice, if any, in red), with a one-line reason under *every* option explaining why it is right or wrong.
- **Explanation:** why the answer is correct.
- **Standard Method:** the step-by-step approach.
- **Shortcut:** a faster exam technique, where one exists.
- **Remediation:** what to do to fix this kind of mistake.

Q_COMP_CPU_IO_001 · CPU, Memory, and I/O Devices · difficulty 1 · expected 35s

CPU, Memory, and I/O Devices set 1: Which component is often called the brain of a computer because it controls processing?

Not quite. The correct answer is A. Read the explanation below, then go to the next question.

☐ **A. CPU**
The CPU is the main processing unit of a computer.

☒ **B. Monitor**
This option confuses the device, component, or memory type with another computer function.

☐ **C. Keyboard**
This option describes a related computer idea but does not answer the question asked.

☐ **D. Printer**
This option is not supported by the standard role of the component or device.

Submit answer

Skip for now **Show hint** **Reveal answer**

Figure 6.2. Right after pressing Submit answer: the result message, the correct option in green, your choice in red, and a reason under each option.

Explanation

The CPU is the main processing unit of a computer.

Standard Method

Classify the term by its role in a computer system. Here, the CPU performs processing and control work, so the correct answer is "CPU".

Shortcut

First decide the category: input, output, processing, memory, storage, backup, power, or port. Eliminate options from the wrong category.

Figure 6.3. Below the options: Explanation, Standard Method, Shortcut and Remediation.

When you have read it, press **Next question**.

Tip

Reading the explanation of every wrong answer is the fastest way to improve. After finishing a session, the Review Queue on the results page lists every question you missed.

The last question

On the last question of any session, a **Last question** box shows how many questions you have answered and how many are still unanswered, with a button to finish. Use *Previous* to go back to anything you skipped, or finish straight away.

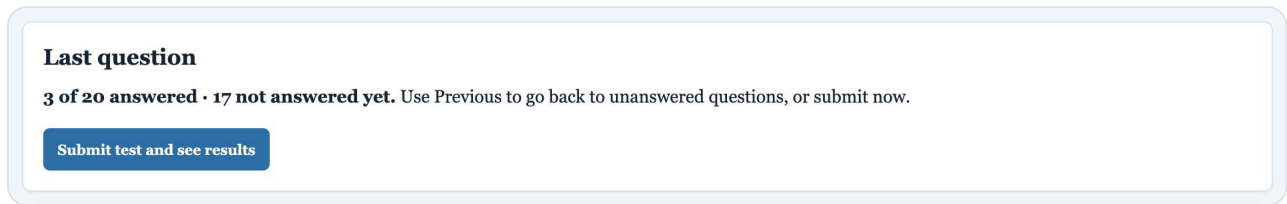

Figure 6.4. The Last question box at the end of a test.

Practice mode and test mode compared

	PRACTICE MODE	TEST MODE (TESTS, MOCKS, DIAGNOSTIC)
Timer	None (except Timed Drill)	Countdown timer shown in a yellow bar
Hints and Reveal answer	Available	Hidden
Explanations	Right after each answer	Only after you submit the whole test
Marking	Not negatively marked	Exam marking, including negative marks for wrong answers

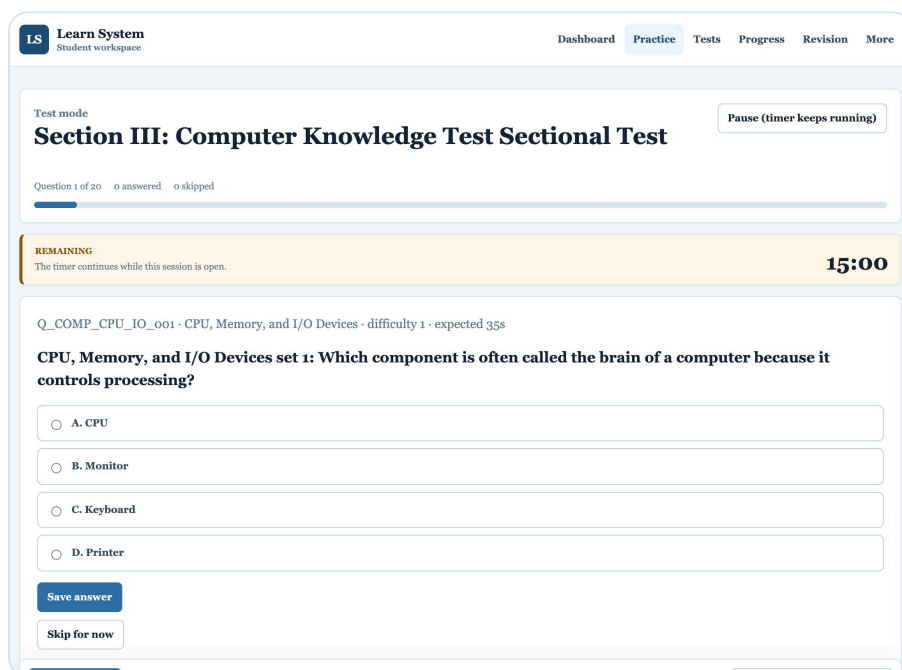

Figure 6.5. A question in **test mode**, with the remaining time shown. There are no hint or reveal buttons.

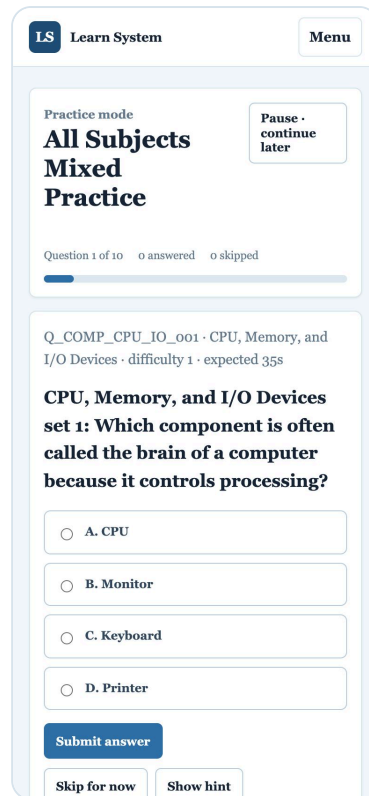

Figure 6.6. The question screen on a phone.

7. Practice

The **Practice** page offers five ways to practise. Each starts a short session of 10 to 30 questions. The first box on the page, **Study one topic**, is where you learn the syllabus topic by topic.

Study one topic

The syllabus is divided into more than 350 small topics (for example *BODMAS* and *Arithmetic Simplification* or *Reverse Percentage*).

1. Choose a subject, or type part of a topic name in the search box (for example *percent*), and press **Find topics**.
2. Each topic appears as a card showing its subject and how many practice questions it has.
3. Press **Read lesson** to learn the topic first.
4. Choose 10, 15 or 20 questions and press **Start practice**.

Twelve topics are shown at a time; use *Next* and *Previous* to see more, and *Clear* to start a new search.

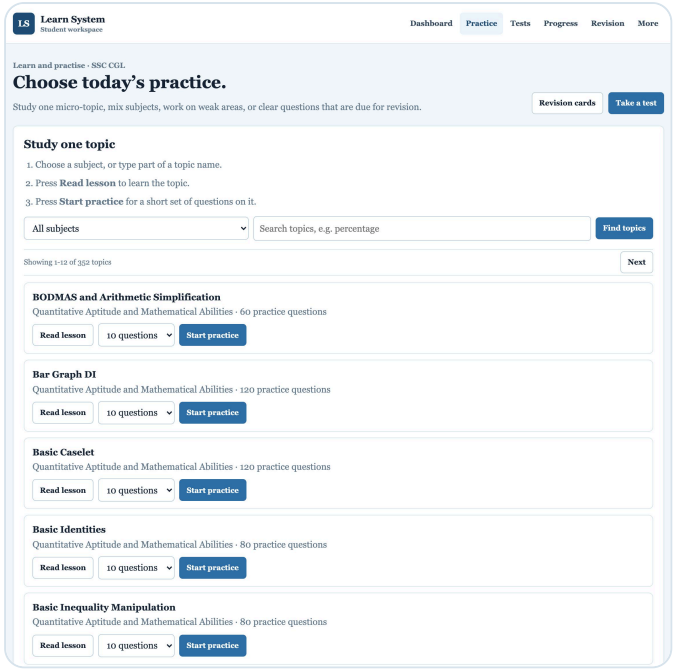

Figure 7.1. The Study one topic box at the top of the Practice page.

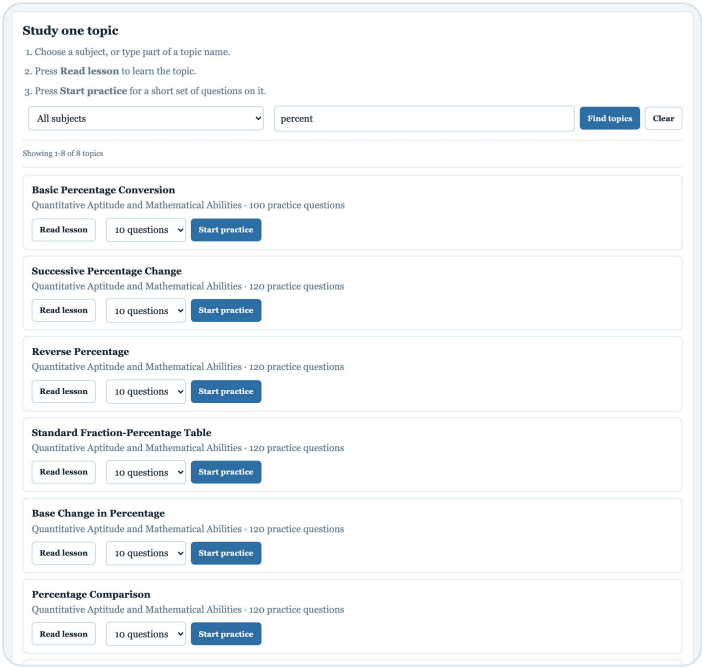

Figure 7.2. Searching for “percent”: each topic card has Read lesson and Start practice.

Which practice should I choose?

MODE	BEST FOR	HOW IT WORKS
Study one topic	Learning one topic properly	Find a topic by subject or search, read its lesson, then practise 10/15/20 questions on it.
Mixed Practice	General daily practice	Untimed, balanced set from one or all subjects. Hints and explanations available. Choose subject and 10/20/30 questions.
Timed Drill	Building exam speed	A short countdown drill (5/10/15 minutes). Review your time and mistakes afterwards.

Weakness Practice	Fixing weak areas	Automatically built from your weakest topics and question types. Recently seen questions are avoided where possible.
Spaced Revision	Not forgetting	Questions you attempted come back after 1, 3, 7 and 21 days. Wrong, skipped and unanswered questions come first.

Mixed Practice

A balanced, untimed question set. Explanations and hints are available while you learn.

All subjects

10 questions

Start mixed practice

Timed Drill

A short countdown drill for building exam speed. Review your time and mistakes afterward.

Weakness Practice

Shows your current weak areas with a weakness score and the signal behind it (for example *Repeated mistakes*). Choose the number of questions and press **Start Weakness Practice**.

Weakness Practice

Build a focused set from your weakest attempted areas and low-mastery archetypes. Recent questions are avoided where possible.

10 questions

Start Weakness Practice

CURRENT WEAK AREA	WEAKNESS	SIGNAL
Art and Architecture GA · 2 attempted	45.0	Repeated mistakes
Blood Relations REASONING · 2 attempted	45.0	Repeated mistakes
CPU, Memory, and I/O Devices COMPUTER · 2 attempted	45.0	Repeated mistakes
Calendar and Clock Reasoning REASONING · 2 attempted	45.0	Repeated mistakes
Coding and Decoding REASONING · 2 attempted	45.0	Repeated mistakes

Figure 7.4. Weakness Practice with your current weak areas.

Spaced Revision

Shows how many questions are *due now*, *upcoming* and *completed*, and lists each due question with its interval and priority. Press **Start Due Revision** to clear them. Try to keep *Due now* close to zero.

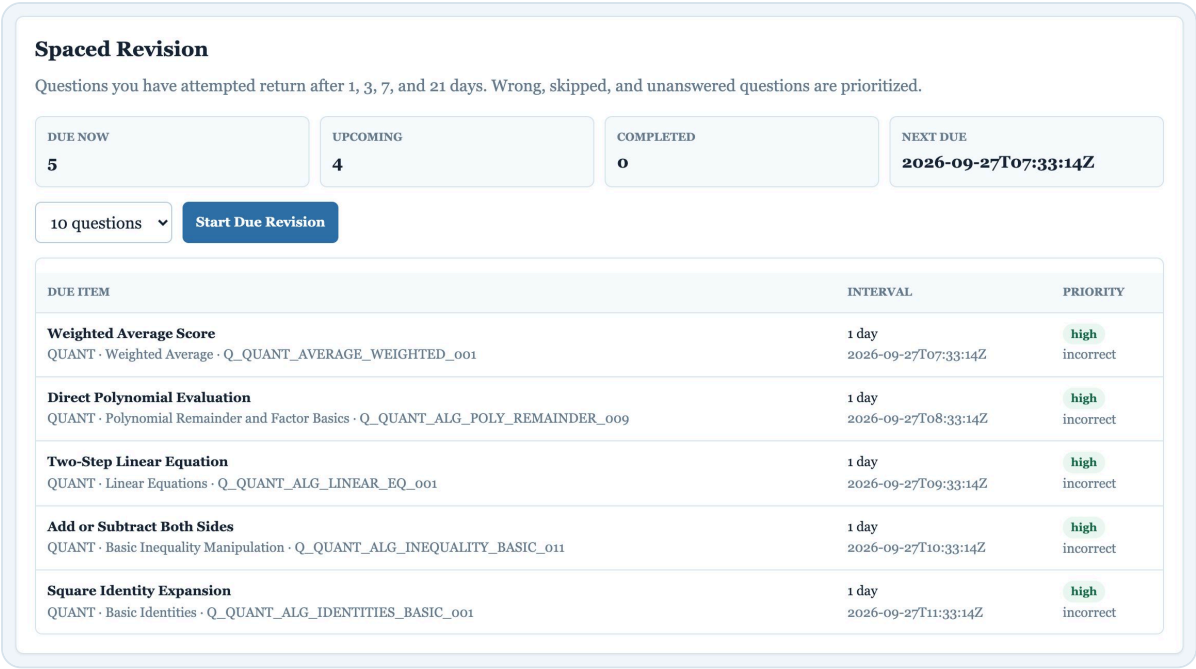

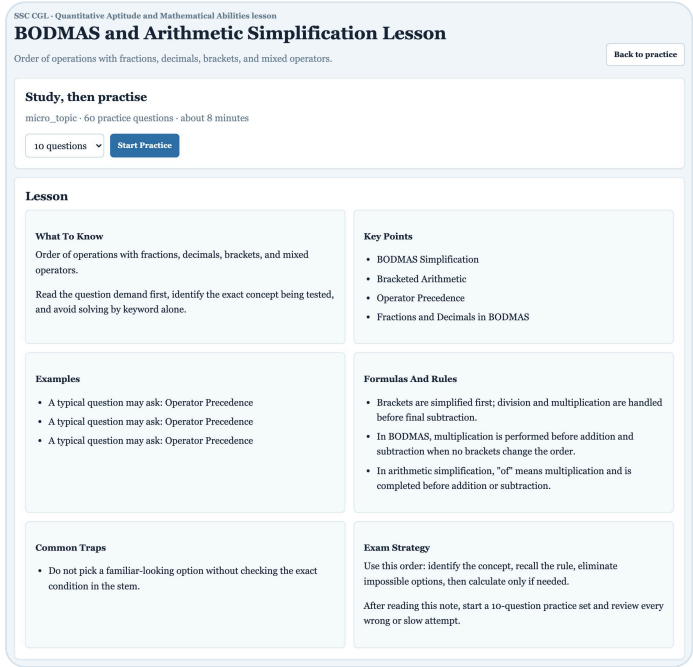

Figure 7.5. Spaced Revision: due, upcoming and completed questions.

8. Lessons

Every micro-topic has a short lesson. Open it from *Practice* → *Study one topic* → *Read lesson*, from a *Study* link in Weak Areas, or from *Open lesson* on a revision card. Each lesson has six short parts: **What To Know**, **Key Points**, **Examples**, **Formulas And Rules**, **Common Traps** and **Exam Strategy**. The *Study*, then *practise* box at the top shows how many practice questions the topic has and lets you start a set straight away.

Tip

For a new or weak topic, read the lesson first, then practise 10 questions, then read the explanations of anything you got wrong.

9. After a session: results and retests

When you press **Finish and see results** (or **Submit test and see results**) and confirm, you see the results page:

- **Score, correct, incorrect, skipped**, plus hints used, answers revealed and total time.
- **Retest And Remediation**: after reviewing your mistakes, press **Start Similar Retest** to practise *similar* questions (not the same ones) to check that you have really understood.
- **Core Metrics**: accuracy, skip rate, completion, expected-time ratio, average time per answer, first-attempt correct and repeated mistakes.
- **Mastery**: updated mastery by subject and difficulty.
- **Weakness And Traps**: weak areas, slow areas, high-error traps and *confusing distractors* (wrong options you chose, and how often).
- **Topic Metrics**: how you did in each topic of the session.
- **Review Queue**: every question you got wrong or skipped, with the option you chose. Open a question to read its explanation.

Session complete

Start Similar Retest

Figure 9.1. The results page after a practice session.

What happens automatically

Every wrong, skipped or unanswered question is added to your spaced-revision queue, and your mastery, weak areas and readiness are updated straight away.

10. Tests and full mocks

The **Tests** page lets you practise in real exam conditions. Tests are in **strict mode**: no hints, no revealed answers, a countdown timer, and exam-style negative marking. Answers and explanations appear only after you submit.

The screenshot shows the 'Tests' page in the Learn System. At the top, there's a navigation bar with 'Dashboard', 'Practice', 'Tests' (active), 'Progress', 'Revision', and 'More'. Below the navigation bar, the page title is 'Exam practice Tests and full mocks.' with a 'View progress' button. The main content area is titled 'SSC CGL Tier I pattern Full Mock test' and includes a 'Start full mock' button. A note states: 'Strict exam mode. Hints and answers remain hidden until you submit the test.' Below this, there's a table with four columns: QUESTIONS, TIME, CORRECT ANSWER, and WRONG ANSWER. The values are: 100, 60 minutes, +2 marks, and -0.5 mark.

QUESTIONS	TIME	CORRECT ANSWER	WRONG ANSWER
100	60 minutes	+2 marks	-0.5 mark

Figure 10.1. The Tests page with the SSC CGL Tier I full mock.

Full mock test (Tier I pattern)

QUESTIONS	TIME	CORRECT ANSWER	WRONG ANSWER
100	60 minutes	+2 marks	-0.5 mark

Press **Start full mock**. Set aside a quiet, uninterrupted hour, exactly like the real exam.

Sectional tests

Sectional tests cover one section at a time, following the Tier I and Tier II patterns. The table shows the number of questions, marks, time and negative marking for each. Press **Start section** next to the one you want.

Sectional Tests		
SECTION	PATTERN	START
General Intelligence and Reasoning General Intelligence and Reasoning · T1_REASONING	25 questions · 50 marks · 60 minutes · negative 0.5	Start section
Section I Part A: Mathematical Abilities Quantitative Aptitude and Mathematical Abilities · T2_MATH	30 questions · 90 marks · 60 minutes · negative 1.0	Start section
General Awareness General Awareness · T1_GA	25 questions · 50 marks · 60 minutes · negative 0.5	Start section
Section I Part B: Reasoning and General Intelligence General Intelligence and Reasoning · T2_REASONING	30 questions · 90 marks · 60 minutes · negative 1.0	Start section
Quantitative Aptitude Quantitative Aptitude and Mathematical Abilities · T1_QUANT	25 questions · 50 marks · 60 minutes · negative 0.5	Start section
Section II Part A: English Language and Comprehension English Language and Comprehension · T2_ENGLISH	45 questions · 135 marks · 60 minutes · negative 1.0	Start section
English Comprehension English Language and Comprehension · T1_ENGLISH	25 questions · 50 marks · 60 minutes · negative 0.5	Start section
Section II Part B: General Awareness General Awareness · T2_GA	25 questions · 75 marks · 60 minutes · negative 1.0	Start section
Section III: Computer Knowledge Test Computer Knowledge · T2_COMPUTER	20 questions · 60 marks · 15 minutes · negative 1.0	Start section
Statistics Statistics Optional Paper · T2_STATS	100 questions · 200 marks · 120 minutes · negative 0.5	Start section

Figure 10.2. Sectional tests for each Tier I and Tier II section.

During a test

- The remaining time is shown in a yellow bar. **The timer keeps running while the session is open**, even if you move to another page.
- Select an option and press **Save answer**, or **Skip for now**. Use *Previous/Next* to move around and change answers.
- Press **Submit test and see results** and confirm. Unanswered questions score zero, and wrong answers lose marks, so do not guess blindly.
- **Pause (timer keeps running)** lets you leave and come back, but the test clock does not stop.

Reviewing past tests

Recent Tests lists every test you have taken with its score. Press **Open** to see the full result: score, accuracy, subject and difficulty breakdown, weak areas and traps, and the review queue of missed questions. You can start a *similar retest* from there.

Session complete

SSC CGL Full Mock - Readiness Check

Review the result, study every missed question, then use the recommended retest and revision actions.

[Back to tests](#)

SCORE 120.0	CORRECT 66	INCORRECT 24	SKIPPED 0
-----------------------	----------------------	------------------------	---------------------

Answered 90 of 90 · hints 0 · reveals 24 · time 4506s

Figure 10.4. A full mock result: score, correct, incorrect and skipped. Retest options, metrics and the review queue follow below.

When to take mocks

Start sectional tests once you have practised all topics in that section. Take full mocks when most subjects are in the *ready* band, then take one regularly (for example weekly) and review each carefully.

11. Progress and analysis

The **Progress** page is your detailed report card. Use the subject filter at the top to see everything for one subject, or *Clear* to see all.

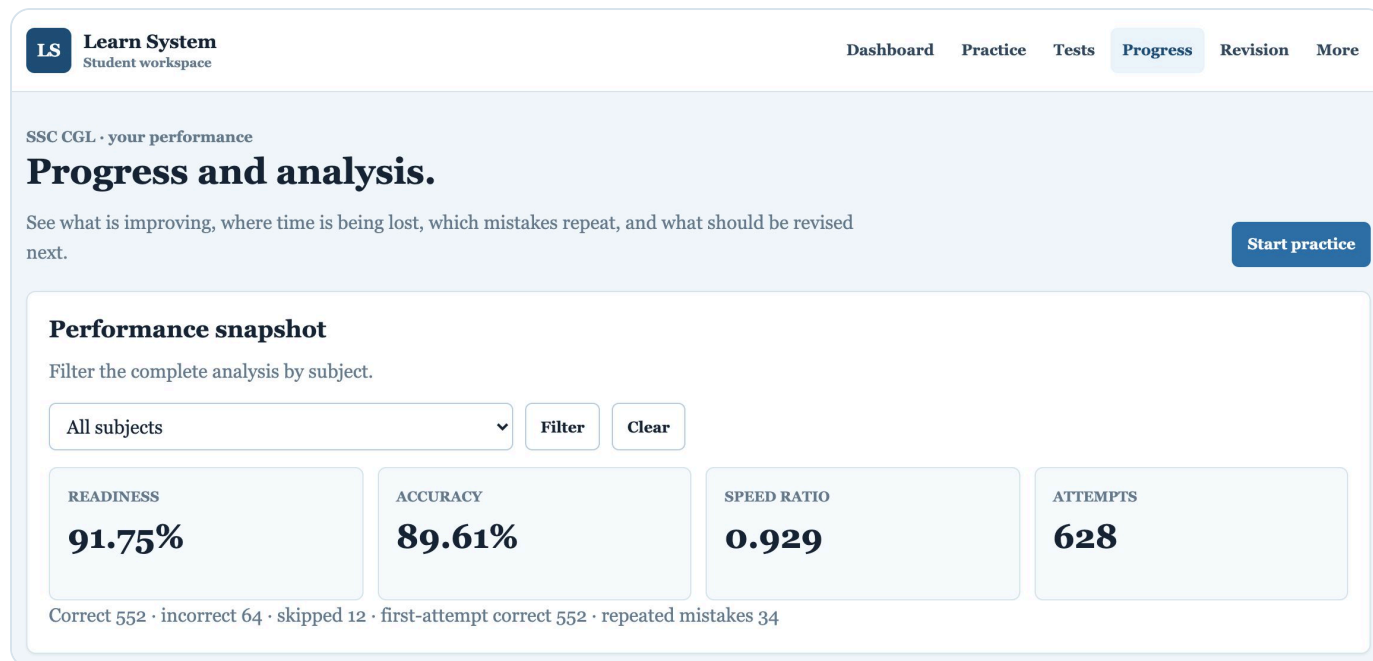

Figure 11.1. The performance snapshot: readiness, accuracy, speed ratio and attempts.

Performance snapshot

MEASURE	MEANING
Readiness	Overall exam readiness (see below).
Accuracy	Percentage of attempted questions answered correctly.
Speed ratio	Your time ÷ the expected time. Below 1.0 is faster than expected ; above 1.0 is slower.
Attempts	Total questions attempted, with correct, incorrect, skipped, first-attempt correct and repeated mistakes.

Sections of the Progress page

- **Subject Readiness:** mastery, band, accuracy, skip rate and speed per subject.
- **Difficulty Readiness:** how you do at each difficulty level in each subject.
- **Topic Heatmap:** every micro-topic you have attempted, weakest first, with accuracy, speed and skip signals.
- **Accuracy Vs Speed:** where you are accurate but slow, or fast but careless.
- **Archetype Readiness:** performance by question type (the pattern of the question).
- **High-Error Traps:** question types where you repeatedly fall for the same wrong option.
- **Question Revision Pressure:** how much spaced revision is building up.

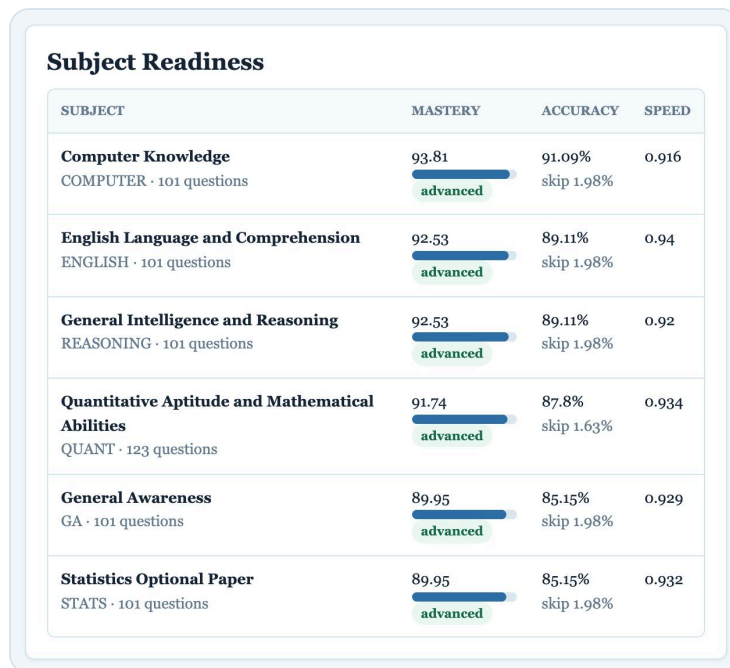

Figure 11.2. Subject Readiness.

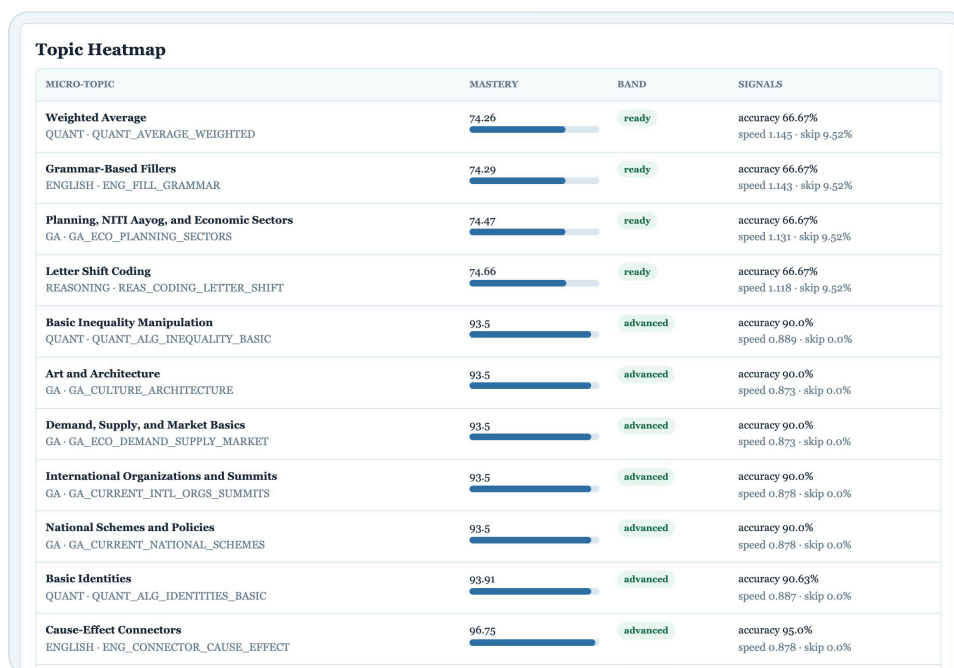

Figure 11.3. The Topic Heatmap, with weakest topics first.

How readiness and bands are worked out

Mastery for a subject or topic is a score out of 100 that combines four things: **accuracy** (the largest part), **coverage** (how much of the area you have answered), **speed** compared with the expected time, and **first-attempt correctness**. The score is placed in a band:

BAND	MASTERY SCORE	WHAT IT MEANS
Advanced	85 and above	Strong. Maintain with revision and mocks.
Ready	70 to 84	Exam-ready level. Polish speed and traps.
Developing	50 to 69	Improving. Keep practising and read explanations.

Weak	Below 50	Needs attention. Read the lesson and use Weakness Practice.
------	----------	---

12. Revision cards

Revision in the top menu opens quick-recall cards: short facts, formulas, rules, traps and patterns from every subject. Cards train your memory so that you recall key points instantly in the exam.

SSC CGL · quick recall

Revision cards.

Recall the answer first, then reveal it and rate how well you remembered. Your next review date is scheduled automatically.

Figure 14.1. My Account: exams and study profile.

SECTION	WHAT YOU CAN DO
My exams	See the exams you are enrolled in and switch which one drives your dashboard, practice, tests and progress.
Study Profile	Change your name, current focus subject, daily question target and timezone. Press <i>Save profile</i> .
Change Password	Enter your current password and a new one (at least 12 characters) twice.
Notification Preferences	Turn in-app and email notices on or off and set quiet hours. WhatsApp notices are planned for the future.
Legal Consent	Review and accept the current terms, privacy, responsible-use and access policies.

Testers

Test accounts are shared. Please **do not change the password, name or profile settings** of a test account.

15. A suggested daily routine

1. **Log in and read the dashboard.** Do the Recommended Next Action first.
2. **Clear due revision** (about 10 minutes): Practice → Spaced Revision → *Start Due Revision*, then Revision cards due today.
3. **Learn one new topic** (about 20 minutes): Practice → Study one topic → Read lesson → Start practice (10 to 15 questions).
4. **Fix a weak area** (about 15 minutes): Weakness Practice, then read every explanation.
5. **Build speed** (about 10 minutes): one Timed Drill.
6. **Check Progress** once a day to see which topics moved.
7. **Once a week:** a sectional test or full mock, followed by a careful review and a similar retest.

Aim to reach your daily target (50 questions by default) every day. Consistency matters more than long sessions.

16. Guide for testers

Thank you for helping test Learn System. Seven fictitious students have been prepared, each at a different stage of SSC CGL preparation. All use the **same password**, which you will receive separately. Capital or small letters in the email do not matter.

LOGIN EMAIL	STUDENT	STAGE	WHAT TO LOOK AT
ananya@ls.nsrk.in	Ananya Gupta	Just registered, nothing done yet	Is it clear what to do first? Starting the diagnostic.

ravi@ls.nsrk.in	Ravi Kumar	Diagnostic half-done (12 answered)	Resuming, the timer, moving between questions, leaving and returning.
neha@ls.nsrk.in	Neha Verma	Diagnostic finished, no practice yet	Understanding the result and knowing what to do next.
pooja@ls.nsrk.in	Pooja Singh	Early practice in a few subjects	Lessons, practice, explanations and the first revisions.
arjun@ls.nsrk.in	Arjun Mehta	Studying all subjects	Weak-area guidance, remediation, revision cards, daily target.
kavya@ls.nsrk.in	Kavya Sharma	Sectional tests and a full mock done	Finding tests, reading scores, uneven readiness across subjects.
aarav@ls.nsrk.in	Aarav Sharma	Advanced, with a few weak areas left	Detailed analytics, revision priorities, long-term guidance.

How to test

1. Use the account you were assigned. Try it on your **phone first**, then on a computer if you can.
2. Explore on your own, without asking anyone for directions. Where you get stuck is exactly what we need to know.
3. Do real things: start a session, answer questions, read explanations, open a test, rate a revision card.
4. Note down anything that is confusing, misleading, slow, broken or missing. A screenshot helps a lot.

What to report

- Which account you used, and phone or computer (and which browser).
- What you were trying to do, what you expected, and what actually happened.
- Any wording you did not understand.
- Any question or answer that looks wrong. You can also use the report option on a question where available.

Please do not

- Change the password, name or profile settings of a test account.
- Share the password outside the testing group.

Your activity is saved

Everything you do in a test account is saved like a real student's work. Other testers may see the effects (for example, a session you started). That is expected. The accounts may be reset between testing rounds.

17. Glossary

TERM	MEANING
Readiness	Your overall preparedness score across attempted subjects (0–100%).

Mastery	A 0–100 score for a subject or topic combining accuracy, coverage, speed and first-attempt correctness.
Band	Weak (below 50), developing (50–69), ready (70–84), advanced (85+).
Micro-topic	A small, specific syllabus topic, such as <i>Weighted Average</i> .
Archetype	A recurring question pattern or type within a topic.
Expected time	The time a well-prepared candidate should take for a question.
Speed ratio / expected-time ratio	Your time ÷ expected time. Below 1.0 is faster than expected.
First-attempt correct	Questions you got right the first time you saw them.
Repeated mistakes	Mistakes made again on the same topic or question type.
Weakness score	How much attention a topic needs. Higher means weaker.
Spaced revision	Bringing questions back after increasing gaps (1, 3, 7, 21 days) so you do not forget.
Remediation	Specific steps to correct a type of mistake.
Retest	A new set of <i>similar</i> questions to confirm you have fixed a mistake.
Strict mode	Exam conditions: timer, no hints, answers only after submission.
Sectional test	A timed test covering one exam section.
Full mock	A complete timed practice exam in the SSC CGL pattern.

18. Questions and troubleshooting

I cannot log in.

Check the email address for typing errors (capital letters do not matter) and the password (capital letters *do* matter). After several failed attempts, login is paused for a short while; wait and try again. Real students can use *Forgot your password?*

My readiness shows “NA”.

You have not answered enough questions yet. Take the baseline diagnostic or a practice session.

Nothing happens when I press Submit answer.

You need to tap one of the options first. After *Reveal answer* the correct option turns green, but it is not selected for you. Tap it (or another option), then press Submit answer.

How do I end a session?

Press **Finish and see results** (practice) or **Submit test and see results** (tests), then confirm. To stop for now and come back later, press **Pause • continue later** instead.

I closed the browser in the middle of a test.

Your saved answers are kept. Log in again and use *Continue* on the dashboard. The timer keeps running while a test is open, so finish it soon.

Why is the same question coming back?

That is spaced revision. Questions you got wrong or skipped return after 1, 3, 7 and 21 days until you answer them correctly.

There are no hints in my test.

Tests, mocks and the diagnostic are in strict exam mode. Hints and answers are only available in practice.

The page looks cramped on my phone.

Use the **Menu** button at the top right to navigate. Tables can be scrolled sideways. If something is unusable, please report it with a screenshot.

I found a wrong question or answer.

Please report it with the question code (shown in grey above the question, for example *Q_COMP_CPU_IO_001*).
